

AMENDMENTS TO CLAIMS

What is claimed is

- 1 1. (currently amended) Eyewear comprising:
2 a frame having a brow web extending approximately horizontally from a top
3 portion of the frame, the brow web including at least one ventilation aperture having an
4 internal side that is substantially sloped with respect to a top surface of the brow web; and
5 one or more lenses mounted to the frame.
- 1 2. (original) The eyewear according to claim 1, wherein the ventilation aperture is
2 substantially round.
- 1 3. (original) The eyewear according to claim 1, wherein the ventilation aperture is
2 substantially oval.
- 1 4. (original) The eyewear according to claim 1, wherein the ventilation aperture is
2 substantially polygonal.
- 1 5. (original) The eyewear according to claim 1, wherein the ventilation aperture has
2 parallel sides.
- 1 6. (original) The eyewear according to claim 1, wherein the internal side forms an angle
2 of approximately forty-five degrees with respect to a surface of the brow web.
- 1 7. (original) The eyewear according to claim 1, wherein the frame includes a lens channel
2 and the aperture is closely adjacent to the lens channel.
- 1 8. (original) The eyewear according to claim 1, comprising a plurality of apertures
2 arranged substantially in a row.
- 1 9. (original) The eyewear according to claim 8, wherein the row approximately follows a
2 curvature of the lens.

1 10. (original) The eyewear according to claim 1, comprising a plurality of apertures for
2 each of two lenses wherein the apertures for each lens are arranged substantially equally-
3 spaced in a row.

1 11. (original) The eyewear according to claim 10, comprising three apertures for each of
2 the two lenses.

1 12. (original) The eyewear according to claim 1, wherein a width of the aperture is
2 substantially equal to a thickness of the brow web.

1 13. (original) The eyewear according to claim 1, wherein the brow web and frame are
2 molded as a single body.

1 14. (original) The eyewear according to claim 1, wherein the frame includes a lower web
2 for each lens wherein the lower web extends from a lower portion of the frame at each
3 lens and further comprising one or more ventilation apertures in each lower web.

1 15. (original) The eyewear according to claim 14, wherein the ventilation aperture for
2 each lower web includes an internal side that is substantially sloped with respect to a
3 bottom surface of the lower web.

1 16. (original) The eyewear according to claim 1, wherein the frame includes side lenses
2 and further comprising at least one ventilation aperture in the brow web for ventilating
3 the corresponding side lens.

1 17. (original) The eyewear according to claim 16, wherein the frame includes a lower
2 web for each lens wherein the lower web extends from a lower portion of the frame at
3 each lens and further comprising one or more ventilation apertures in each lower web.

1 18. (original) The eyewear according to claim 17, the ventilation aperture for each lower
2 web includes an internal side that is substantially sloped with respect to a bottom surface
3 of the lower web.

1 19. (original) Eyewear comprising a frame having a brow web extending approximately
2 horizontally from a top portion of the frame, the brow web comprising a plurality of
3 ventilation apertures for each of two lenses mounted to the frame wherein the apertures
4 for each lens are arranged substantially equally-spaced in a row and wherein each
5 aperture has parallel sides and a center axis that is substantially sloped with respect to a
6 top surface of the brow web.

1 20. (original) The eyewear according to claim 19, wherein the ventilation apertures are
2 substantially round.

1 21. (original) The eyewear according to claim 19, wherein the ventilation apertures are
2 substantially oval.

1 22. (original) The eyewear according to claim 19, wherein the ventilation apertures are
2 substantially polygonal.

1 23. (original) The eyewear according to claim 19, wherein the internal side forms an
2 angle of approximately forty-five degrees with respect to a surface of the brow web.

1 24. (original) The eyewear according to claim 19, wherein a width of the aperture is
2 substantially equal to a thickness of the brow web.

1 25. (original) The eyewear according to claim 19, wherein the brow web and frame are
2 molded as a single body.

1 26. (original) The eyewear according to claim 19, wherein the frame includes a lower
2 web for each lens wherein the lower web extends from a lower portion of the frame at
3 each lens and further comprising one or more ventilation apertures in each lower web.

1 27. (original) The eyewear according to claim 26, wherein the ventilation aperture for
2 each lower web includes an internal side that is substantially sloped with respect to a
3 bottom surface of the lower web.

1 28. (original) The eyewear according to claim 19, wherein the frame includes side lenses
2 and further comprising at least one ventilation aperture in the brow web for ventilating
3 the corresponding side lens.

1 29. (original) The eyewear according to claim 28, wherein the frame includes a lower
2 web for each lens wherein the lower web extends from a lower portion of the frame at
3 each lens and further comprising one or more ventilation apertures in each lower web.

1 30. (original) The eyewear according to claim 29, the ventilation aperture for each lower
2 web includes an internal side that is substantially sloped with respect to a bottom surface
3 of the lower web.

1 31-47. (canceled)

1 48. (original) A method of manufacture of eyewear comprising:
2 molding a frame as a single body having a brow web extending approximately
3 horizontally from a top portion of the frame and including molding a plurality of
4 ventilation apertures in the brow web and wherein each aperture has parallel sides and a
5 center axis that is substantially sloped with respect to a top surface of the brow web;
6 attaching one or more lenses to the frame; and
7 attaching hinged earpieces to the frame.

1 49. (original) The method according to claim 48, wherein the apertures for each lens are
2 arranged substantially equally-spaced in a row for each of two lenses.

1 50. (new) Eyewear comprising:
2 a frame including at least one ventilation aperture;
3 a brow web extending approximately horizontally from a top portion of the frame,
4 wherein the ventilation aperture extends through the brow web, the brow web including a
5 top surface that is substantially horizontal while being worn, an angle separating the top
6 surface and an internal side of the aperture being approximately forty-five degrees or
7 less; and
8 one or more lenses mounted to the frame.

1 51. (new) The eyewear according to claim 50, wherein the angle is approximately forty-
2 five degrees.

1 52. (new) The eyewear according to claim 50, wherein the ventilation aperture is
2 substantially round.

1 53. (new) The eyewear according to claim 50, wherein the ventilation aperture is
2 substantially oval.

1 54. (new) The eyewear according to claim 50, wherein the ventilation aperture is
2 substantially polygonal.

1 55. (new) The eyewear according to claim 50, wherein opposite sides of the ventilation
2 aperture are parallel.

1 56. (new) The eyewear according to claim 50, wherein the frame includes a lens channel
2 and the aperture is closely adjacent to the lens channel.

1 57. (new) The eyewear according to claim 50, comprising a plurality of apertures
2 arranged substantially in a row.

1 58. (new) The eyewear according to claim 50, wherein the row approximately follows a
2 curvature of the lens.

1 59. (new) The eyewear according to claim 50, comprising a plurality of apertures for each
2 of two lenses wherein the apertures for each lens are arranged substantially equally-
3 spaced in a row.

1 60. (new) The eyewear according to claim 59, comprising three apertures for each of the
2 two lenses.

1 61. (new) The eyewear according to claim 50, wherein a width of the aperture is
2 substantially equal to a thickness of the brow web.

1 62. (new) The eyewear according to claim 50, wherein the brow web and frame are
2 molded as a single body.
